

NAW en tekst loopt door elkaar op documenten

Hiervoor pas je de venster positie aan bij afdrুকinstellingen. Deze staat te laag als NAW en tekst declaratie door elkaar gaan lopen.

The screenshot shows the 'Afdruk instellingen' (Print settings) page in the onatal system. The page is divided into several sections:

- briefpapier pdf**: A section for uploading a PDF document. It includes a text box with instructions and an 'Upload' button.
- enveloppe venster positie**: A section for envelope window position. It includes two input fields: 'Venster boven(mm)' and 'Venster links(mm)', both set to '140'.
- letter type en grootte**: A section for letter type and size. It includes a dropdown menu for 'Lettertype' (set to 'Helvetica') and an input field for 'Lettergrootte' (set to '11'). A black arrow points to the 'Lettertype' dropdown.
- afzender/praktijk gegevens positie**: A section for sender/practice information position. It includes a text box with instructions.

The left sidebar contains a navigation menu with categories like 'Admin', 'Instellingen', and 'Praktijken / instellingen'. The top right corner shows the user 'Joyce Mol', the date '5 juni 2019 13:49', and the initials 'JM OP'.
